

IRC tracks and supports the M.O.R.E. "Powder Puff Race for the Cure"

We are delighted to be supporting and tracking with the IriTrack system the Ladies only Powder Puff Race for the Cure helping to raise money for the Cedars-Sinai Women's Cancer Research Institute for Breast Cancer Research. The race is taking place at Barstow, California this weekend (October 13th 2007). It is an all ladies race with a BBQ and music to follow, and the public is welcome.

Apart from the great safety features that benefit the drivers, the public can also view the race live online by going to the IRC website:

www.racetheworld.net

IRC is tracking 13 racers in all classes – you will need the latest version of Adobe Flash player – the race starts at 8:30am and ends at 3:00pm Saturday the 13th. As long as you have a computer with internet access you can watch in real time and follow your team.

For more information on M.O.R.E. and the Powder Puff race and to see how you can make a donation or play a part in the day go to:

<http://moreracing.net/powderpuff/index.htm>

We wish the best of luck to all the drivers and teams and hope you beat your target for this year, last year \$55,000-00 was raised. M.O.R.E., we salute you. Congratulations!

You are IRC Pioneers.
