

## IRC Live Tracks 298 Vehicles for Historic Best in the Desert BlueWater Resort and Casino Parker 425

Congratulations to Best in the Desert for presenting the incredible and successful BlueWater Resort and Casino Parker 425 event.

At Parker this year, IRC set a new record for itself as it tracked the entire field of almost 300 entries plus support vehicles for Best in the Desert Racing Association "BlueWater Resort and Casino Parker 425" 2008.

"It was an amazing spectacle to be at the Start Line and see that many vehicles in one space then to see Race Course Maps on computer screens and on the IRC Public Viewing Pages populate with all the vehicles as the race progressed." Commented Anthony Cantons of IRC.

Additionally, IRC implemented a number of new procedures in conjunction with Best in the Desert to help improve the administrative service we supply to Best in the Desert and all the race competitors; managing late IRC orders within the 'event registration' room. This in turn made for a much smoother ride for both sides as it allowed both competitors and IRC to come together in calmer environments and share information with each other regarding orders, installation, how the system works and the full range of services that IRC offers.

We also for the first time ran a new satellite map based Public Viewing Page as well as IRC's traditional Flash based Public Viewing Page

It is still possible to see the Parker 425 links to these different pages by using the following link:

Once again, thank you all of you who participated and made the Best in the Desert Racing Association "BlueWater Resort and Casino Parker 425" 2008 event the amazing and memorable experience it was.

The next Best in the Desert event for cars and trucks will be Terrible's "250" at Primm, Nevada. Order Forms for the IriTrack Satellite Communication system are on the IRC home page now [www.racetheworld.net](http://www.racetheworld.net)

IRC (International Racing Consultants) is located in Tustin California and specializes in bringing advanced satellite communications to land, air, and sea sports along with commercial and personal logistics.
